

Mix Master

Just possibly the most piquant, palate-enlivening drink mixers you've ever tasted, England's *Fever-Tree Premium Mixers* are notable both for what they contain—all-natural ingredients such as Sicilian lemons in the Bitter Lemon, Ecuadorean green ginger in the Ginger Ale and quinine from African fever trees in the Tonic—and for what they leave out. The four mixers (also including a Club Soda) are produced without preservatives, chlorinated water, artificial flavoring or cloying high-fructose corn syrup. Almost a shame to mix 'em a'tall, old chap. *Four-pack, 200-ml bottles, \$6. www.fever-tree.com.*
